CONTENTS

Announcement v

An inequality for the weighted sums of pairwise i.i.d. generalized Rayleigh random variables *C.-Y. Hu and G.D. Lin* 1

A discrete version of the Stam inequality and a characterization of the Poisson distribution *A. Kagan* 7

A property of linear forms of independent random variables related to uniqueness of linear structure *A. Kagan and R.G. Laha* 13

Mean-variance bounds for order statistics from dependent DFR, IFR, DFRA and IFRA samples *T. Rychlik* 21

On asymptotic distribution for two-truncation parameter family *M.B. Bhatt and S.R. Patel* 39

A new measure in local influence *R.M. Loynes* 47

The partial Koziol–Green model with covariates *R. Braekers and N. Veraverbeke* 55

Exponential and polynomial tailbounds for change-point estimators *D. Ferger* 73

Estimation in continuous state-space branching processes *M. Kale and S.R. Deshmukh* 111

Moments inequalities of aging families of distributions with hypotheses testing applications *I.A. Ahmad* 121

Fast computation of the exact null distribution of Spearman's ρ and Page's L statistic for samples with and without ties *M.A. van de Wiel and A. Di Bucchianico* 133

Propriety of intrinsic priors in invariant testing situations *S.C. Dass* 147

Improved sequential procedures for estimating the percentile of a normal distribution *E. Isogai and C. Uno* 163

A proof of the asymptotic normality of the inverse sampling estimator in finite population sampling *D.L. Hawkins* 175

Ranked-set sampling with regression-type estimators *Z. Chen* 181

The asymptotic distribution of the proportion of correct classifications for a holdout sample in logistic regression *P. Hadjicostas and G.C. Hadjinicola* 193

Population size estimation based on estimating functions for closed capture–recapture models *A. Chao, P.S.F. Yip, S.-M. Lee and W. Chu* 213

Optimal designs for variance function estimation using sample variances *P. Goos, L. Tack and M. Vandebroek* 233

L_p-optimality for regression designs with heteroscedastic errors *K.-H. Li and N.N. Chan* 253

Properties of optimal polynomial designs under smoothing spline models *N.A. Butler* 259

(*contents continued*)

An application of information theory and error-correcting codes to fractional factorial experiments *I. Ben-Gal and L.B. Levitin* 267

Robustness of balanced incomplete block designs to randomly missing observations *P. Prescott and R. Mansson* 283

Erratum to: "Testing nonparametric statistical functionals with applications to rank tests" [J. Statist. Plann. Inference 81 (1999) 71–93] *A. Janssen* 297
